Target Audiences:

Application developers who want to build cloud-native applications or redesign existing applications that will run on Google Cloud.

Prerequisites and Pre-work:

- Completed *Google Cloud Fundamentals: Core Infrastructure* or have equivalent experience
- Working knowledge of Node.js
- Basic proficiency with command-line tools and Linux operating system environments
- Previous course(s) in this learning path

All modules are available for download in PDF form (with student notes including linked resources) under Course Resources.

Completing one version of each lab is **required**. Each lab is available in **Node.js**. In most cases, the same labs are also provided in **Python** or **Java**. You may complete each lab in whichever language you prefer.
